

FRG

## INNOVATION

*Our thinking is geared towards the unorthodox use of available resources and tools to maximize effectiveness and value for our clients.*

# FRG

---

*We are dedicated to helping our clients around the world maximize the effectiveness and value of their investments in risk management technology, methodology and processes. We provide clients with unique technology offerings, implementation services, business advisory services and thought leadership in various areas of risk management.*

---

## MISSION

We leverage the experience and knowledge of our team to help our clients achieve their particular goals. Our technology offerings are geared to help our clients keep pace with their changing business requirements. This combination of technology and services empowers our clients with unparalleled choice and competitive advantage.

## HISTORY

The firm was founded in 2002 with the concept of becoming the premier risk management services firm. The initial focus was on providing clients with expertise and guidance for risk technology projects. It has since expanded to include business advisory services for risk management, implementation services for a variety of technologies, platform services for ongoing support, and software product offerings for various vertical markets. In 2016, FRG expanded into Asia, opening an office in Kuala Lumpur. The company has now helped some of the world's largest financial, energy and commodity firms successfully implement enterprise risk management projects.

## OUR PRODUCTS

Our specialized offerings enhance and streamline risk technology from mainstream vendors such as SAS. Our hosted solutions offer benefits of the type provided by an application service provider along with the security and flexibility afforded by a hosted offering.

The VOR (Visualization of Risk) platform gives money managers an unparalleled look at their portfolio risk and performance. VOR combines risk analytics with comprehensive portfolio management, performance, and reporting, in one cohesive environment.

## OUR SERVICES

When you turn to us, you are tapping into a suite of services ranging from risk technology to analytical modeling to business process advisory. Our Business Analytics team has the expertise to ensure your company has the best solutions to manage its risk and analytics. The Platform group provides ongoing support for clients, ensuring effective communication between technical and business initiative teams. **Please contact us to see how our range of services can be tailored to your specific needs.**
