SAS Administrator

Description

The Financial Risk Group is looking for a mid to senior level SAS Administrator to support internal and client facing SAS installations. This position will be responsible for working with and supporting FRG and our client's developers and end users in support of multiple installations and projects.

You will be responsible for:

- All aspects of SAS application and platform administration covering multiple SAS products and installations
- SAS software installation, configuration, upgrades and maintenance
- Design, development, and rollout of SAS system infrastructure
- Provide assistance with user management, problem resolution, system testing, and performance monitoring
- OS administration/configuration/recommendations in support of SAS Administration
- Development of monitoring scripts and alert processes
- Backups of metadata, data and other associate objects
- Develop, maintain, and test disaster recovery contingencies
- Develop and implement information security plans and procedures utilizing recognized best practices
- Act as a liaison to other IT teams (Unix, Windows, DBA) in support of the SAS Environment as required
- Provide user support with the installation of client tools such as Enterprise Guide and SAS Add-in for Microsoft Office

Essential:

- MS degree in the areas of Computer Science, Economics, Mathematics, Engineering, Sciences, or Finance, AND 2-4 years relevant experience. OR, a BS degree plus a minimum 5 years relevant experience
- Demonstrated experience installing and configuring a variety of SAS products
- Strong aptitude for measured impact analysis, risk assessment, change management, and planning of recovery options
- Experience with SAS promotion processes requiring migration of content from Dev > Test > Prod
- Possess general SAS coding knowledge
- Possess general system administration knowledge/experience
- Must be proficient with the Unix OS (RedHat preferred)
- Must be able to communicate effectively with people of varying technical ability
- Bachelor's degree or higher in a technical area
- 3+ years of experience in a SAS Administrator role
- 5+ years of technology experience
- Located in the Raleigh-Durham area; can be a remote
