

ASSISTANT CONSULTANT

Description

You will be accountable for helping some of the world's largest organizations in the area of risk management to successfully implement and leverage risk technology. Your skills will aid in the implementation and development of risk products while developing and enhancing relationships with our valued clients.

In this role you will:

- Research, learn, and comprehend the different roles on an implementation team
- Research and learn how application components relate to a solution
- Begin to contribute as a junior member of the implementation team
- Develop multiple object components with significant supervision from a team leader
- Learn and develop an understanding of system design documents and how the work assigned to you impacts the platform
- Execute unit tests with significant supervision from a team leader
- Begin to demonstrate an understanding of the project maturity life cycle
- Organize and run all assigned SME sessions
- Pass all assigned certifications
- Embrace challenges and learn new skills; be a catalyst for change
- Perform other tasks as assigned

Essential:

- BS degree in the areas of Computer Science, Economics, Mathematics, Engineering, Sciences, or Finance AND 0-1 years relevant experience
- Develop a working understanding of risk management concepts
- Strong written and oral communication skills
- Excellent problem solving, decision making, and organizational skills
- Ability to travel up to 25 percent of the time as the business needs dictate
- Ability to work alone and as part of a team
