TESTER ASSISTANT

Description

In this role, you will have quality accountability for some of the world's largest organizations. You will learn software and pass certifications in order to design and execute functional system tests. Functional system tests will validate code correctness and test for document defects. Your responsibilities will include learning and applying positive and negative testing, defect retests, and regression testing. You will be expected to learn how to review software documentation, participate in reviews, foster relationships with FRG internal teams and with FRG's valued clients.

In this role you will:

- Read available documentation to understand testing requirements and financial risk management principles
- Learn to write and execute functional test cases per established standards
- Participate in test case reviews
- Report defects per established standards
- Foster relationships with business and development teams
- Support client (user acceptance) testing
- Learn the process of preparing and generating test data
- Learn and successfully record and prepare test evidence
- Learn and successfully conduct smoke and regression testing
- Learn and successfully automate applicable tests
- Update / maintain test case repository
- Learn and pass the ISTQB certification
- Learn and pass SAS software certifications
- Perform other tasks as assigned

Essential:

- BS degree in the areas of Computer Science, Economics, Mathematics, Engineering, Sciences, or Finance AND 0-1 years relevant experience
- Willingness to learn and acquire knowledge, understanding, and application of testing principles
- Willingness to learn Agile methodology concepts
- Familiarity with testing tools/software a plus
- Strong written communication, oral communication and presentation skills
- Demonstrated problem solving, decision making and organizational skills
- Ability to travel up to 25 percent of the time as the business needs dictate
- Ability to work alone and as part of a team
- Ability to multi-task and handle rapidly shifting priorities in a fast-changing environment (time management, flexibility)
- Ability to work under pressure
- Attention to detail
- Analytical thinking
- Time management skills
- Some knowledge of SAS, SQL a plus
