

FINANCIAL RISK  
GROUP

# PLATFORM SERVICES

Financial Risk Group's Platform Services team provides outsourced technology operations for your company's risk products, including design, development, testing, and ongoing production support. FRG's enhanced services remove the burden and expense from owning or maintaining the required technology on your own. Whether your company requires human capital, technology infrastructure, or a fully-outsourced solution, FRG can help.

## Hosted Technology Operations

FRG provides fully-hosted solutions to support your risk management projects, so you can focus on core business functions. FRG's outsourced technology operations are an extension of your team.

- Fully-hosted solutions
- Technology integration covering enterprise risk analytics, data management, derivative valuation technology and model implementation
- Architecture design tailored to meet client needs based off multiple technology providers
- Administration / Application support
- Production Help Desk and ticketing
- 24x7 system monitoring
- Service Level Agreements adaptable to your business demands
- Scalability and flexibility to adapt to your changing business needs
- Quicker implementation time
- Reduction in Total cost of ownership
- Frees internal resources to focus on core operations
- Reduced project risk
- Broad pool of talent with extensive experience implementing risk management solutions

## Business Analytics Support

FRG's Business Analytics specialists have the expertise to ensure your company has the best solutions to manage its risk and analytics. Services can be tailored to your specific needs, including:

- Project plan design across multiple technology vendors and service providers
- Training materials and sessions tailored to meet the client's interest and complexity level
- Custom development of models and analytical solutions
- Business process review and recommendations geared towards strategic value, operational efficiency and regulatory compliance
- Model risk assessment in valuation and other areas
- Unique risk solutions for hedge funds and other financial institutions
- Test case development and execution
- Implementation and integration services for derivatives valuation technology including FinCAD and FEA

*"Our ability to solve and enhance complex business problems is what sets FRG apart from other competitors."*

— **Chuck Beck, Sr. Director of Outsourced Services**

## Application Support Services

FRG provides resources who help bridge the gap between business and technology. We will help you achieve a consistent and efficient workflow for development, testing, production roll out, and ongoing support.

- ETL Development and maintenance staffing/support
- Model support, including maintenance of current models and development/implementation of new models
- SAS® Administration staffing/support
- SAS® Application staffing/support
- Application maintenance teams
- Application Help Desk and Ticketing system
- Testing staffing/support
- Technical documentation
- Training services
